New Application Thermal Imaging

Long-Wave Infrared Filters

Materion Balzers Optics is the leading manufacturer of LWIR filters used for temperature measurement and thermal imaging. Our windows and filters can have engineered transmission and reflection between 8 and 14 μm . For LWIR cameras, a window can be coated with an antireflective coating on one face and a longpass filter on the other face. Our filters can be metallized to be compatible with hermetic solder assembly. [Datasheet \(PDF\)](#)

Sales and Business Development News

Our Business Development Team is Growing

We are pleased to announce that Meng Kiat Lim has joined Materion Balzers Optics as the Director of Business Development for the APAC region. Meng Kiat has a long history with our company - he worked for Balzers Optics AG for seven years as the Sales Director for Asia, before the acquisition by Materion in 2020. He has a wealth of experience in the optical components industry, and has held senior positions in Product Management, Sales, and as a Managing Director. We are very happy that he has decided to rejoin the team and wish him a great start.

Meng Kiat Lim
Director of Business
Development (APAC)
