

# Shaping the Century of the Photon

## Upcoming Events

### BIOS/Photonics West – Jan 22-27, 2022

Find the best solutions, components, instruments, and system providers from around the world. Meet top suppliers, gain industry insights, and discover new possibilities. [Learn more.](#)

### Defense and Commercial Sensing (DCS) April 5-7, 2022

Leading event where researchers and engineers share emerging technology in sensors, infrared technology, laser systems, spectral imaging, radar, lidar, AI/machine learning, and more. [Learn More.](#)

## Sales and Business Development News

### Optical Solutions for Defense Applications

Our engineers and scientists are continually innovating optical solutions to meet the needs of the defense market, providing precision and specialized components suited for a wide variety of applications. Our precision products offer greater flexibility and more choices for optimizing defense applications.

Thanks to its speed and agility, the Leopard, representing Defense, is always one step ahead. We also adapt quickly to changing conditions in the markets and see ourselves as a forward-looking problem-solving partner.
