

BIOS/Photonics West, San Francisco

Visit us at our booth from Feb 01-06, 2020 and meet with our experts for specific advice. Try our special action points at our booth 3210, hall D:

- Hyperspectral Imaging - check out our latest applications
- Automotive - take a closer look at our Puddle Light Gobos
- Multispectral Imaging - discover the Candy Factory and take some candy with you

Join our presentations about "High performance Optical Filters for Biophotonic applications" by Isabell Götz, Product Manager, on February 2, 2020 at 11.30pm AND "Cutting edge Optical Filters for Multi- and Hyperspectral Imaging" by Isabell Götz, Product Manager on February 4, 2020 at 3:30pm.

ICG Filters for medical endoscopy

Dielectric filter solutions help shape the endoscopy landscape of tomorrow

Since its development in the 1950s ICG (Indocyanine green) has become an important dye in fluorescence analysis techniques. In recent years it has proven to be the best marker in a broad range of medical applications, from cardiology to ophthalmology, as well as being important for endoscopy techniques...

Laser cavity mirrors with tailor-made spectral requirements

Optics Balzers produces individually adaptable, application-specific laser cavity mirrors. A perfectly controlled coating optimizes the precise spectral parameters of the laser mirrors. The optimization of the spectral attributes allows the targeted influencing of the laser power yield...

Optics Balzers successful Christmas donation campaign

Giggle Doctors spread smiles and moments of happiness - the Theodora Foundation

For Christmas 2019, Optics Balzers AG decided to waive customer gifts and rather support a charitable foundation with the remaining amount. In addition, at the annual Christmas party in Liechtenstein, the employees collected money and the Board of Directors spontaneously supported this collection with a generous donation. The amount was donated to the [Theodora Foundation](#). It offers different programmes tailored to children's needs and situations. Since its beginnings in 1993, the Theodora Foundation has been pursuing its mission to bring laughter and joy to children in hospital. Every year, artists from the Foundation - the Giggle Doctors - spread moments of happiness and smiles to thousands of children across Switzerland. At the site Jena, Germany, the Bürgerstiftung Jena was supported as in previous years.

Our next Events...

Laser World of Photonics, Shanghai

LASER World of PHOTONICS CHINA, Asia's largest trade fair for the photonics industry, has taken place in Shanghai every year since 2006. It presents the entire range of photonics in an international setting, tailored to the specific needs of the Chinese market.

Come to our booth no. 1714 to discover the unique solutions and the wide variety of applications that optical components allow. We look forward to welcoming you as our guest.

Analythica, Munich

Welcome at Analytica in Munich, the leading international trade fair for laboratory technology, analytics, biotechnology and analytica conference. Discover unique solutions and diverse applications with optical components at our booth no. 226 in hall A2.

We look forward to welcoming you as our guest.
